

As a historical player in the field of architecture in French-speaking Switzerland, CCHE offers much more than projects. The multidisciplinary teams involved in the office's developments consider each project from a cross-disciplinary perspective, drawing on more than 25 complementary professions to provide a vision. The synergies and complementarities between the 7 sites of activity, in Lausanne, Nyon, Geneva, La Vallée, Zürich, Porto and Perspectives Construction allow the deployment of projects at all scales (urbanism, architecture, interior, design and realization) by relying on innovative tools and methodologies. This desire to surpass oneself is also reflected in our commitment to various international collaborations, notably with the offices of BIG (DK) and Kengo Kuma (JA), for the realization of ambitious projects.

To complete our team, we are looking for an indefinite period of time:

Architects 100% **with strong ability with Archicad**

Your main tasks :

- Development of ideas, competitions, feasibility studies
- Elaboration of different projects in team or autonomously (from pre-project to execution)
